# Students Search for Knowledge

As a teacher, you are a valued community member on the front lines of an evolving educational movement. All of us at *Titanic* Museum Attraction in Branson and Pigeon Forge respect and appreciate your role in providing youngsters a quality education.

Professional educators agree that a key component in learning involves a student's freedom to engage meaningfully in whatever sparks his/her interest and imagination. The Teacher's Guide Program at *Titanic* is designed to help you do just that. Its goal is to provide a unique "learning experience" that engages every child who visits the museum. With *Titanic* as their classroom, students can explore their interests in art, history, math, science and geography—all in a meaningful and "natural learning" process.

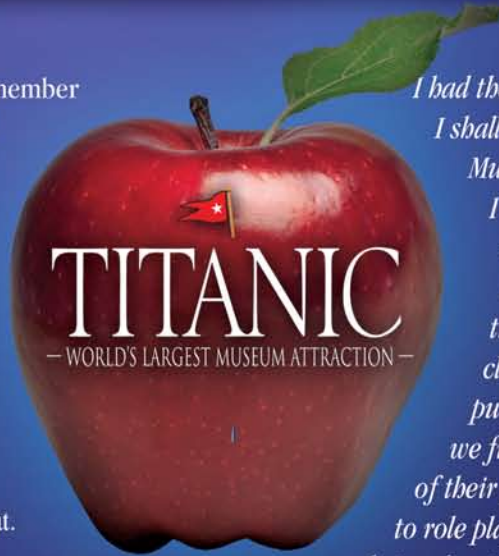

Because there is so much to explore, we created a scavenger hunt to help students become acquainted with the ship while they tour. To download the *Titanic* Scavenger Hunt, visit [www.titanicattraction.com](http://www.titanicattraction.com) and click the top menu's "Education" tab. Next, click "Scavenger Hunt." Bring along printed copies for every child in your group.

Children are in awe when they board *Titanic*. We see it in their eyes and in the questions they ask. Suddenly they realize *Titanic* isn't a musty, stodgy museum but an exciting ship-shaped classroom filled with history, hands-on experiments, mysteries to solve and fascinating stories about real people and events.

Sincerely yours,

*John Joslyn & Mary Kellogg-Joslyn*

Owners, *Titanic* Museum Attraction

*I had the most moving and memorable experience. I shall always remember visiting the RMS Titanic Museum Attraction. Since I am a teacher, I chose this non fiction story as one I love to teach. Now that I have visited the museum I want more than ever to share this experience with my students. In my class years ago, I chose to let my students pull names of the passengers and only after we finish the unit do they find out the fate of their passenger. It has always been so much fun to role play the story and end the semester on a high but sad note." — Cheryl Allen*

*"The Titanic is a great educational tool for teaching your children the history of the Titanic and about the people living during that time period. All the hands on activities available such as touching the Iceberg and placing your hands in the freezing water is a great way for kids to relate to the experience. I highly recommend taking your entire family to the Titanic Attraction for a great educational and entertaining experience." — Connie Hernandez, Home Educating Family*

*"This is a great educational tour and just an all around fun thing to do." — Jason and Angela Price, Music and Travel Nation*

A green chalkboard with a yellow border. The text on the board is written in white. At the bottom right of the board is a small smiley face icon. To the right of the board, a woman in a white sailor's uniform and two children are looking at the board. The woman has her hand raised as if pointing at the board. One child is also pointing at the board.

TEACHERS CAN ENHANCE THE TITANIC MUSEUM ATTRACTION EXPERIENCE USING LANGUAGE ARTS/SOCIAL STUDIES, SCIENCE, GEOGRAPHY, MATH ACTIVITIES OR STUDENTS CAN DO A SCAVENGER HUNT WITHIN THE EXHIBIT.  
THE INDIVIDUAL CATEGORIES HAVE RECOMMENDED STUDY OPPORTUNITIES:

- 1) Language Arts/ Social Studies
- 2) Science Activity
- 3) Geography Activity
- 4) Math Activity
- 5) Scavenger Hunt: Down load our Q&A and have them bring their work sheets to the Titanic Museum Attraction to find all the answers. It will allow students to expand their knowledge of the Titanic disaster.
